Cyberdrome

Mathew Grey is a brilliant scientist who accidentally unleashed a plague that threatens the planet. Riddled with guilt and running out of time, he uses a dangerous technology to enter a computer-generated world called Cyberdrome, hoping to unravel a mystery that could be the key to Earths survival. Alek Grey is a software hacker with the unique ability to outsmart the best Artificial Intelligence programs of his day. When he is called in to help, he is shocked to learn that both his father and ex-fiancee have become trapped inside the simulation, unable to be removed without risk of brain death. Alek knows of only one way to rescue the people he loves, but will he risk all of humanity to save them?
