He has waited and waited for the right moment to make things right, but now that opportunity has been taken away from him in the worst possible manner. If only he had moved faster. If he had stepped up and did something sooner he would not have suffered this loss. However, he will sit no longer because these people have lit a fire under him and inside of his heart that burns. Now, he will stand here until he does what he has come to do; make everyone responsible acknowledge to him what they have done, or die in denial. *Roots in the Drain* is more than just a story. It is a thought-provoking read that presents perspectives on some of the most personal areas of human life.
