

Dynamic Thought: The Law of Vibrant Energy (Masterpiece Collection) Large Print: Great Classic (Masterpiece Collection: Great Classic)

THIS book will deal with Life. It holds that Life is Universal that it is inherent in, and manifests (in different degrees) in every part, particle, phase, aspect, condition, place, or relationship, in the World of Things that we call the Universe. It holds that Life manifests in two aspects or forms, which are generally found by us in connection and co-operation with each other, but which are both, probably, an expression of some One Thing higher than either. These two aspects or forms, which together go to make up or produce that which we know as Life, are known as (1) Substance or Matter; and (2) Mind. In this book the term Substance is used in preference to Matter, owing to the fact that the term Matter has become closely identified with certain ideas of the Materialistic school of thought, and has generally been regarded by the public in the light of dead matter, whereas this book holds that all Substance is Alive. The term Mind is used in the sense of Mind, as we know it, rather than as Mind, as it is, as The Cosmic Mind. In some places the term Mind-principle is used to convey the idea of a portion of the Great Principle of Mind, of which that which we call Mind is but a small and but partially expressed portion. These terms are explained and illustrated as we proceed. The aspect of Energy or Force is not treated as a separate aspect or form of Life, in this book, for the reason that it is regarded as merely a manifestation of Mind, as will appear as we proceed. We have much to say regarding Motion, but the writer has tried to explain and prove that, at the last, all Motion results from Mental Action, and that all Force and Energy is Vital-Mental Force and Energy.
