

# First Contact: Scientific Breakthroughs in the Hunt for Life Beyond Earth [1ST CONTACT] [Hardcover]

In First Contact, Marc Kaufman provides a gripping tour of the magnificent new science of astrobiology that is closing in on the discovery of extraterrestrial life. In recent decades, scientists generally held that the genesis of life was unique to Earth.

It was too delicate a process & the conditions needed to support it too fragile, For it to exist anywhereelse. But we ars now on the verge of the biggest discovery since Copernicus & Calilico told us that Earth is not the center of the universe.
