

All American Assassin

Prologue As the Ancient Roman Empire began to crumble, several wealthy and influential Roman (and Egyptian) families formed a political alliance. To protect this alliance, they created a society of assassins shrouded in absolute secrecy. Surviving for centuries, hidden from view, this secret society exists globally to this day while maintaining a central, dominant presence throughout the United States. A small group of powerful families maintain direct control of this shadow world to directly influence the people who control central banks, key corporations, government intelligence, media and military operations throughout the world. A child named Henry Arthur Miller was raised in an orphanage until he was 8 years old. He was then taken to be raised as an assassin in this secret society. Over thirty years later, Henry believed he had outlived his usefulness to the organization and was scheduled to be terminated. He began to write a secret journal as an act of silent defiance and desperation. His journal is contained in the pages of this book.
