

Ice Diaries

Its 2018 and Toris managing. Okay, so London is under twenty metres of snow, almost everybody has died in a pandemic or been airlifted south, and the only animals around are rats. Plus her boyfriend never returned from going to find his parents a year ago when the snow began but shes doing fine. Really. Home is an apartment thats luxurious, if short on amenities, in a block which used to be home to rich City bankers. A handful of fellow survivors are her friends, and together they forage for food and firewood, have parties once a month and even run a book club. The problem is they have no long-term future; eventually provisions will run out. Tory needs to find transport to make the two-thousand-mile journey south to a warm climate and start again. One day she comes across an exhausted and wounded stranger face-down in the snow, and saves his life. Morgan is a cage fighter from a tougher, meaner world where its a mistake to trust people. Hes on the run from the leader of the gang he used to work with. Hes disturbingly hot. And he has a snowmobile.
