

An Introduction to Modern Geography: With an Appendix, Containing an Outline of Astronomy and the Use of the Globes / By James Thomson (Classic Reprint)

In the following publication, the materials have been drawn from the latest and most authentic sources ;and it has been the object of the Author to convey the information in a Plains familiar style, angiltoniekesuohaselectionasmayinxerestan dinstructthe u. PT he accounts of the Several countries consist, iii general, of two parts, distinguished by dilferent kinds of tpe.. The first, and raps the more important of these, is intended to assist the pupile in learning the relative situations of places; and is to be studied in connexron with maps. The second contains an outline of the natural and political gwgflyphy of each country ;and may either be studied along with the irst, or mav form a second course perhaps in sonneries withe repetition of me former. With me em ones ections, and with the General Views of the great divisions of the earth, the learner should be made accurately acquainted at the commencement; and the interesting and important subjects, treated of in the A rranrx, should be studied as soon as the age of the pupil, or other circumstances, may render it advisable. It may also be advantatieous, to enliven the study of the other arts, bintermixing wi them a considerable portion of the llgliter and more entertaining matter contained in me Notes. In preparing the present edition for the press the whole has been carefully revised, and various additions and imnrovementl have been made. In compliance with the wish of the Publishers, and of several teachers, Questions for examination have been Introduced, particularly on the more important parts of the Notes. These Questions--smile some teachers will employ, in preference, those that may occur to themselves--will be servieeab eto pupils in the preparation of their lessons; and it will be found to be a useful exercise for learners to extend the list, or to write out for themselves similar questions on the(Typographical errors
