

Physics and Mathematics of the Nervous System: Proceedings of a Summer School organized by the International Centre for Theoretical Physics, Trieste, ... 21-31, 1973 (Lecture Notes in Biomathematics)

This volume is the record and product of the Summer School on the Physics and Mathematics of the Nervous System, held at the International Centre for Theoretical Physics in Trieste from August 21-31, 1973, and jointly organized by the Institute for Information Sciences, University of Tübingen and by the Centre. The school served to bring biologists, physicists and mathematicians together to exchange ideas about the nervous system and brain, and also to introduce young scientists to the field. The program, attended by more than a hundred scientists, was interdisciplinary both in character and participation. The primary support for the school was provided by the Volkswagen Foundation of West Germany. We are particularly indebted to Drs. G. Gambke, M. -L Zarnitz, and H. Penschuck of the Foundation for their interest in and help with the project. The school also received major support from the International Centre for Theoretical Physics in Trieste and its sponsoring agencies, including the use of its excellent facilities. We are deeply indebted to Professor A. Salam for his kind cooperation and also to Professor P. Budini, Dr. A. M. Hamende, and to the many members of the Centre staff whose hospitality and efficiency contributed so much to the success of the school. We are pleased to acknowledge the generous aid and cooperation of the University of Tübingen and would like to thank its President, A.
