

## PACES for MRCP: Pt. 2

The MRCP Part 2 Oral and Clinical component was replaced by PACES (Practical Assessment of Clinical Examination Skills) in June 2001. This text aims to match the content and level of difficulty of this examination. It contains chapters that cover all five PACES stations - respiratory and abdominal; history taking; cardiovascular and neurological; communication skills; and skin, locomotor, eyes and endocrine - and presents the ten most common diagnoses in each station. The book presents detailed information on relevant points of examination, summary of presentation, causes of the diagnosis, investigations and brief management. A communication skills chapter contains information on informing patients about diagnosis, relevant features of a disease, complications, prognosis, investigations and management.
