

Roland's Post Apocalyptic Railroad: Survival On The Train Tracks (Prepper Fiction Novelettes Book 4)

There was a place in time where man had to reinvent himself after the solar storm that devastated the technology of the world. The acclaimed series of books from the Prepper Trilogy told what occurred before, but not after, the community took on more people to feed and support. They began to starve and were forced to look for solutions further afield. Join us now in the fourth and final book of the Prepper Novelettes as the southern cowboy Roland and the inventor/engineer John, take on the task of building a railroad to scavenge the forgotten and stranded trains in the countryside of America in an effort to survive just a few more months. One man's skill and knowledge, another man's farm and shared food production when combined with the collective armed community might, just possibly might, make it all possible. Follow the story down the tracks of survival. I put one of my best survival tricks in this one, not found in survival books, so this book costs a tiny bit more, but far worth the extra dollar.
