Interview with the Author Q - So, what makes the Brody Taylor Thriller Series special? A - I wanted to write the kinds of books I enjoy reading. I love fast-paced psychological thrillers with surprising twists. Authors like Jeffery Deaver, Stieg Larsson, Michael Crichton and Dan Brown tick the box for me. But I also love gritty modern detective novels especially if the police are hunting down serial killers. In this case, I particularly enjoy Ian Rankin, Michael Connelly, Patricia Cornwell and Stuart McBride. In the end, both sets of authors have influenced my writing, because my books are tech-based, psychological thrillers and detective mysteries rolled into one series! I'm pretty sure that's fairly unique. But the most important factor I've adopted from all these amazing authors is their page-turning ability!

Q - What order should I read the books in? A - I've written the series so you can read the books in any order, and all the story threads will tie up nicely by the time you're finished. If you do want to read them in order, I'd suggest the following sequence:- Social Engineer- Invasion of Privacy- Taking up Serpents (coming Oct

2016)Q - So, why should readers give these books a try?A - Because readers love Brody Taylor, the hero of the Brody Taylor Thriller Series. Hes a very cool hacker who blurs right and wrong all the time. Because he can do so much with his skills it doesnt mean that he should, but he always does! His antics always take readers on a very entertaining ride. If you then add DI Jenny Price, a strong British female detective who first appears in Invasion of Privacy, you have a wonderful counterpoint to Brody, which increases the conflict and suspense throughout this series. So, anyone who likes fast paced psychological thrillers, with plot twists you dont see coming, great characters and an urban backdrop will get a kick out of this series.
