

The Bankers Club Defaults Book I (The Bankers Club 1)

The corporate world is driven by avarice and power-mongering. At the center of it is The Banker, who is not a very nice person. He manipulates the system to quietly build an empire and to implement his plan for world domination. The story weaves through recent events, causing you to question uncomfortably whether there is in fact a coordinated strategy at work. Using the CEOs of the worlds biggest banks, The Banker accumulates more than a trillion dollars in property ownership. Long before 9/11 a plan is put into action, and rears its ugly head on September 11, 2001 in New York. The mortgage collapse seven years later in 2008 is phase two of The Bankers plan. 2015-2016, the fickle mortgage industry collapses again with property foreclosures totaling 36 percent of the total property in the U.S. The two orchestrated property collapses quietly leave The Banker in control of more than 51 percent of the total land mass of the United States of America. What are his goals as the countrys major land owner? The plan has nearly succeeded, but a few hackers and FBI agents stand between him and an Economic Coup of the whole of The United States of America, and most of the western world. Their action-packed resistance provides hope that we are not simply pawns in a grand scheme. The first of two novels of The Bankers Club Defaults is guaranteed to get your heart racing, and sets the stage for the unbelievable realization that one man might control the economy of the western world.
