

The Nightingale Bones

Someone has been waiting a long time for Alice Towne to arrive in Hawthorne. Two hundred years, in fact. Trying to accept her mothers belief that the women of the Towne family are blessed, not cursed, with supernatural abilities, twenty-seven-year old Alice leaves a disapproving Boston husband to housesit for the summer in tiny Hawthorne, a historic village famous in the 1800s for its peppermint farms and the large, herbal-essence distilleries that flourished around the Massachusetts township. She settles into a beautiful old home with a tragic reputation. There are said to be sightings and sounds from the spirit of a young woman who hanged herself after all her children died there of illnesses in the 1900s. But soon, Alice experiences firsthand encounters that convince her the spirit is not who people think. The truth is shocking, steeped in the towns distillery history and its legends of a local wizard and witchcraft. As she falls in love with a local farmer whose family legacy is as tangled in the magick and the mystery as her own, Alices fear becomes not whether the past can be resolved ... but whether its waiting to claim new victims. Ariel Swan teaches English and creative writing in western Massachusetts where she lives with her husband, three cats, and a small flock of happy chickens. Visit her at Arielswan.com.
