

The Potters House

Olivia has settled on the tiny Greek island of Halemni; she is married to a Greek man and is mother of two small sons. As the turquoise of summer dissolves into the cool of autumn, so the rhythm of island life goes on unchanged, until an earthquake ravages the Turkish coast, sending a tidal wave to envelop the island. Its force devastates Halemni, tearing apart the fabric of the small community. In the aftermath, a stranger appears. Kitty, an Englishwoman, is alone and without possessions. She accepts Olivias offer of refuge in the potters house, but she guards her past as preciously as Olivia protects her young family.
