

## The Shadowlight Chronicles: Episode 1

From Drew Avera, author of The Dead Planet Series, and Robert Franklin comes a story about a future where Earth is at risk of annihilation. Meet Angela, a young woman whose life has just been turned upside down, all thanks to a small thumb drive and the content within it. After the death of her adopted parents, Angela is orphaned, forced to grow up without truly knowing why the life she loved was stripped away from her. That is, until she meets Blake, her fathers trusted friend and her new guardian. Together they uncover the truth behind the conspiracies surrounding the Shadowlight Matrix which has only been uttered in hushed whispers until now. Join Angela as she sets out on a journey to unearth ancient secrets and discoveries that hold the key to Earths survival. Without her the world as we know it will be destroyed.
