

From Thriller Award-winning author Alexandra Sokoloff: A terrifying novel of suspense inspired by the world-famous ESP experiments conducted by Dr. J.B. Rhine in the Duke University parapsychology department. After experiencing a precognitive dream that shatters her engagement and changes her life forever, young California psychology professor Laurel MacDonald decides to get a fresh start by taking a job at Duke University in North Carolina. She soon becomes obsessed with the long-buried files from the world-famous Rhine parapsychology experiments, which attempted to prove if ESP really exists. As she teams up with another charismatic professor, they uncover disturbing reports, including a mysterious case of a house supposedly haunted by a poltergeist, investigated by another research team in 1965. The two professors and two exceptionally gifted Duke students move into the grand, abandoned mansion to replicate the investigation, unaware that the entire original team ended up insane... or dead.

-----Reviews: A creepy haunted house, reports of a 40-year-old poltergeist investigation, and a young researcher trying to rebuild her life take the publish or perish initiative for college professors to a terrifying new level in this spine-tingling story that has every indication of becoming a horror classic. Based on the famous Rhine ESP experiments at the Duke University parapsychology department that collapsed in the 1960s, this is a chillingly dark look into the unknown. -- Romantic Times Book Review, 4 1/2 stars Sokoloff keeps her story enticingly ambiguous, never clarifying until the climax whether the unfolding weirdness might be the result of the investigators' psychic sensitivities or the mischievous handiwork of a human villain. -- Publishers Weekly Alexandra Sokoloff takes the horror genre to new heights.

-- Charlotte Examiner Sokoloff shines, and deserves kudos for her crisp, direct style, excellent characterization, and for weaving the real life history of the Duke Rhine lab into her own fictional landscape. -- Horrorworld Alexandra Sokoloff's talent brings readers into the dark and encompassing world of the unknown so completely, that readers will find it difficult to go to bed until the last page has been turned. Her novels bring human frailty and the desperate desire to survive together in poignant stories of personal struggle and human triumph. But the truly fascinating element of Sokoloff's writing is her deep dig into the human psyche and the horrors that lie just beneath the surface of our carefully constructed facades. -- Fiction Examiner Sokoloff has provided a new and interesting twist to the genre, one that will stay with the reader long after the book has been read... the hair on the back of my neck may never lie down.--
