

Uncertain Stars: Speculative Fiction from Silicon Valley

New Stories from the Brightest Stars of Silicon Valley! Journeys define science fiction and fantasy, as epic heroes climb mountains and traverse deserts, or flaming rockets burst towards the heavens. Its the very mystery of the unknown that compels human imagination. Now speculative fiction authors in Silicon Valley join to offer a collection of these journeys to alternate dimensions, back in time, up space elevators, and to dystopian futures. Mythic gods embark on hero-quests, aliens descend in flying saucers, telepaths try cosplay, and parodies of familiar characters join the excitement. A great celebration of place fills the collection since journeys and destinations include Scotland, South Africa, the Little Bighorn, and the great Silicon Valley. This extreme eight-story adventure mustnt be missed.

Sandra Saidak (Author of From the Ashes) - Goodreads Silicon Valley was a great location where enthusiasts could meet, mingle, and And although there may have been brief periods of uncertainty and suspense, survive SETI did.
