

With a Little Help

With a Little Help is my first serious experiment in self-publishing. I've published many novels, short story collections, books of essays and so on with publishers, and it's all been very good and satisfying and educational and so on, but it seems like it's time to try something new. You see, I've always released my work under open licenses from the Creative Commons project, so that my readers could share and remix my works. A good number of these readers wanted to know why I didn't distribute the physical book as well, and see what a writer working on his own could do. So here we have it. With a Little Help, consists of 12 stories, all reprints except for Epoch, which was commissioned by the Ubuntu projects Mark Shuttleworth for \$10,000 (this being the most expensive option for buying the book don't worry, there are cheaper editions).
